Domaincom microsoft autoupdate2KeyUpdateDeadline DaysBeforeForcedQuitData TypeIntegerPossible valuesvarious (example: 5)CommentsThere is no default value.. A group of applications, such as Word, Excel, and PowerPoint All Microsoft applications that are updated by MAU.. In this way, if an update to Yosemite (for example, OS X 10 10 1) is available, the new.. That means for the next set of updates that Microsoft releases, you would need to configure a new date and time for the deadline.. NoteA deadline can be set within the user configuration profile or the management configuration profile.. If you downloaded Office from the Mac App Store, and have automatic updates turned on, your apps will update automatically.

For example, if you want to configure a deadline of 5 days after an update for Excel is detected, you can use the following:If you want to configure a deadline of 4 days for Excel and 7 days for PowerPoint, you can use the following:Configure a deadline for a specific date and time.. But once the deadline is reached, any applications the user has open will be closed and the updates applied.. If you use a certain number of days for the deadline, you can re-use that deadline for future updates that Microsoft releases.. When you specify a deadline, you can configure the deadline in either of these two ways:A specific date and timeA certain number of days after the update is detectedIf you use a specific date and time for the deadline, it's tied to a specific version that you're updating to.. The number of days is calculated from when an update is detected by MAU You can also configure how many days in advance of the deadline that Automatic Download and Install mode begins.
